

Unit 6: Linear Equations

Name: _____

$<$
less than
 \leq
less than or equal to

6.3 Introduction to Linear Inequalities-Notes

$>$
greater than
 \geq
greater than or equal to

Example (1): Define a variable and write an inequality to describe each situation. Graph each situation.

- a) Contest entrants must be at least 18 years old.

x = age of contest entrants

$$x \geq 18$$

① Circle the number.

② Shade the point if it is included (greater than or equal to... less than or equal to).

③ Shade the correct part of the number line.

- b) The temperature has been below -5°C for last week.

t = the temperature

$$t < -5$$

Note: We did not shade the point because -5 is not included.

- c) You must have 7 items or less to use the express checkout line at the grocery store.

g = # of items allowed at express checkout.

$$g \leq 7$$

Note: The data is discrete so we only shade the points NOT the entire line.

- d) Scientists have identified over 400 species of dinosaurs.

d = # of dinosaur species

$$d > 400$$

Example (2): Is each number a solution of the inequality $b \geq -4$? Justify the answer.

a) -8	b) -3.5	c) -4	d) -4.5	e) 0
Is -8 greater than or equal to -4? No!	Yes	Yes	No	Yes

$b \geq -4$

Example (3): Graph each inequality on a number line.

Write 4 numbers that are solutions of the inequality.

- a) $t > -5$ b) $-2 \geq x$ c) $0.5 \leq a$ d) $p < -\frac{25}{3}$
- $x \leq -2$ $a \geq 0.5$
