

Grade 9 Math - Section 1.4 - Surface Area of Composite Triangular Prisms Worksheet

Name: _____

Find the surface area of each composite object.

1.

S.A Triangular Prism:

$$2 \text{ Triangles: } 2\left(\frac{bh}{2}\right) = 2\left(\frac{12 \times 8}{2}\right) = 96$$

$$\text{Bottom: } 12 \times 5 = 60$$

$$\text{left: } 16 \times 5 = 80$$

$$\text{right: } 16 \times 5 = 80$$

$$316$$

S.A Rectangular Prism:

$$[2 \cdot L \cdot W] + [2 \cdot L \cdot H] + [2 \cdot W \cdot H]$$

$$= [2 \cdot 19 \cdot 5] + [2 \cdot 19 \cdot 7] + [2 \cdot 5 \cdot 7]$$

$$= 190 + 266 + 70$$

$$= 526$$

$$\text{Overlap} = 12 \times 5 = 60$$

$$\text{T.S.A} = 316 + 526 - 2 \times 60$$

$$= 316 + 526 - 120$$

$$= 722 \text{ ft}^2$$

2.

S.A Triangular Prism:

$$F \frac{1}{2} B: 2 \left(\frac{8 \times 10}{2} \right) = 80$$

$$\text{Sides: } 2(11 \times 6) = 132$$

$$\text{Bottom: } 8 \times 6 = 48$$

$$\underline{260}$$

S.A Rectangular Prism:

$$F \frac{1}{2} B: 2(18 \times 9) = 324$$

$$L \frac{1}{2} R: 2(6 \times 9) = 108$$

$$T \frac{1}{2} B: 2(18 \times 6) = 216$$

$$\underline{648}$$

$$\text{Overlap} = 2(8 \times 6) = 96$$

$$\begin{aligned} \text{T.S.A} &= 260 + 648 - 96 \\ &= 812 \text{ ft}^2 \end{aligned}$$
